HSE: MODIFICATION OF MAXIMUM RESIDUE LEVEL (MRL) IN EU

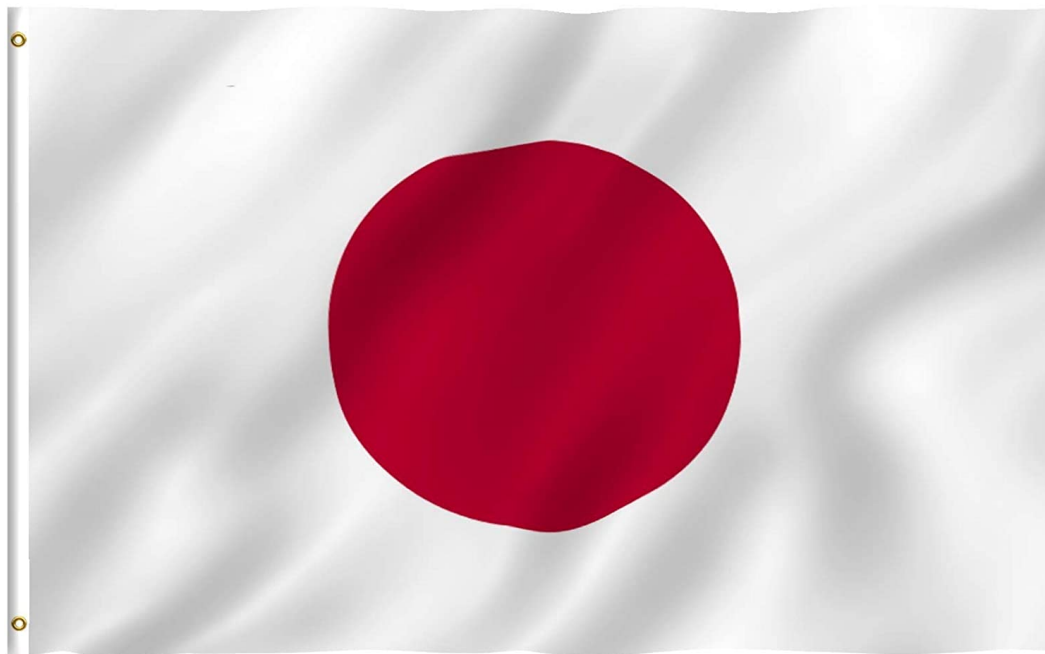

The EU SCoPAFF (Standing Committee on Plants, Animals, Food and Feed) has voted on changes to EU MRLs, which will come into force after they are published in EU Regulations.

HSE will aim to identify NI (Northern Ireland) PPP (plant protection product) authorisations that require amending or withdrawing as a result of changes to EU MRLs. However, authorisation holders are also responsible for checking that their NI PPP authorisations comply with the amended EU MRLs. Moreover, under the terms of the Withdrawal Agreement and Northern Ireland Protocol, NI PPP authorisations must comply with the EU MRLs in force.

For more information about the modification of the MRL report press [here](#)

JAPAN: ADDED 187 EXISTING CHEMICAL SUBSTANCES IN ISHL

On March 26, 2021, the Japanese Ministry of Health, Labor and Welfare (MHLW) published on the official gazette 187 chemical substances as existing chemical substances under the Industrial Safety and Health Law (ISHL). In this way, manufactures and importers will not need to notify them as new chemical substances. In Japan, new chemical substances are required to be notified under ISHL and the Chemical Substances Control Law (CSCL), respectively. For CSCL, the notified substances are added to the Inventory of Existing and Notified Substances (ENCS) five years after the notification is completed. For ISHL, the notified new substances will be published as existing substances around a year after the completion of notification.

VIETNAM: DETAILS CFS EXEMPTIONS REQUIREMENTS FOR IMPORTED COSMETICS

On Dec. 31, 2020, the Vietnam Ministry of Health issued Circular 29/2020/TT-BYT, amending and supplementing the articles of several regulations, including Circular 06/2011/TT-BYT Providing Cosmetic Management. The amendments and supplements took effect on Feb. 15, 2021. Then on Mar. 16, 2021, Vietnam issued Consolidated Document 07/2021/VBHN-BYT Consolidating the Circular on Cosmetic Management, integrating the amended and newly added articles. The main amendments include the clarification of CFS exemption requirements and the necessary information on CFS, and slight adjustments on the cosmetic notification report template.

KKIDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTHORITY ONLY EARLY 2021

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKIDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
