HSE: VENTILATION IN THE WORKPLACE TO REDUCE THE RISK OF SPREADING OF COVID-19

HSE has included on its website advice on how to use CO2 monitors and how to measure CO2 to identify poor ventilation of the environment.

The guide on how to balance ventilation with keeping people warm in the workplace has simple steps that can be taken to make sure the workplace is adequately ventilated.

Recommendations include:

- partially open windows and doors as this can still provide adequate ventilation
- opening higher level windows to create fewer drafts
- If the area is cold, relaxing dress codes so that people can wear extra layers and warmer clothing

ECHA: COLLECTED MORE THAN 400 SUBMISSIONS ON GLYPHOSATE

The parallel consultations on glyphosate held by EFSA and ECHA closed on 22 November 2021. During the two-month consultation, all stakeholders had access to the scientific assessments prepared by the national competent authorities of Hungary, France, the Netherlands and Sweden, collectively known as the Assessment Group on Glyphosate (AGG). Through the two consultations, 416 comments were received from EU and non-EU countries, most of which came from Argentina.

COLOMBIA: REACH APPROVED

Colombia joins Chile as the second Latin American country to implement its chemical regulation. The new REACH-inspired decree applies to industrial chemicals identified as hazardous by the GHS that are manufactured or imported in quantities exceeding 100 kg per year.

Manufacturers and importers must register their covered substances in the new national inventory of industrial chemicals and update them annually. Priority chemicals face increased data load and require risk assessment and risk reduction programs created by the manufacturer or importer. GHS is required for both labeling and SDS. The new registry will link to the monitoring of chemicals covered in a pollutant release and transfer registry for environmental impacts and to a new Toxicity management system for health risks.

UK: LATE DUIN IS POSSIBLE

On 27th October the possibility to notify DUIN (Downstream Import Notification) in the UK expired. Companies that submitted their notifications for their substances in time to the HSE, will benefit from extended UK REACH registration deadlines as follows: 27 October 2023, 2025, and 2027 depending on the annual tonnage and the hazards of the substance. However, companies that have not notified their substances by the deadline and wish to continue importing EU REACH registered substances into the UK market at 1 tonne or more per year can still submit DUIN late notifications.

UK-based importers and UK-based only representatives appointed by non-UK suppliers (such as non-UK manufacturers / formulators) may submit DUIN notifications late. When the designated OR sends the late DUIN, the GB downstream users will be covered by this DUIN and will not have to send their own.

The HSE recommends doing this as soon as possible.

Our UK - BREXIT services cover the fulfillments of national regulations in the UK which will come into force after the release.

RNI srl provides the services listed for EU companies and for UK based companies:

- For national authorization applications still under evaluation in the UK, submitted by companies based in the EU, it is necessary that the latter appoint their own OR (based in the UK) by 31.12.2021 to continue the authorization process.
- LATE DUIN notification for GB importers of substances and mixtures **is possible after 27.10.2021**
- New UK REACH registrations according to new deadlines
- Compliance with new UK regulations (REACH, CLP; BPR, etc.)
- Exclusive Representation Services in UK for Italian / EU companies (OR service)

In collaboration with our partner LANDILEX, we also offer [legal consultancy](#).

**KKDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY
TURKISH AUTHORITY ONLY EARLY 2021**

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
