**BREXIT: FIRST INDICATIONS OF AGREEMENT
BETWEEN UK AND EU**

The agreement signed on 24 December between the United Kingdom and the European Union entered into force on 1 January 2021 under provisional regime, pending the amendment of the parliaments of the Member States. The commercial and cooperation agreement consists of:

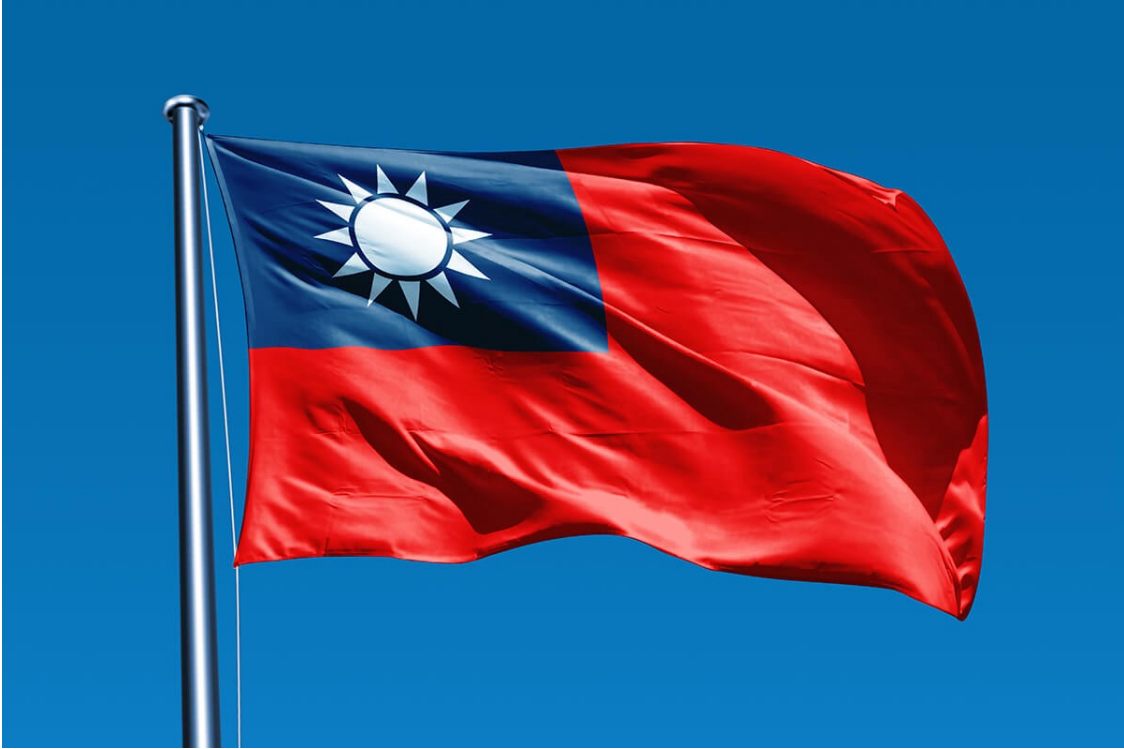

- A free trade agreement that not only covers the trade of goods and services but also many other sectors of interest such as investments, air transport, tax transparency etc.
- a close partnership on citizens' security, for better collaboration between the national police and the judicial authorities, to fight and prosecute crime and terrorism;

- an overarching governance framework to guarantee the rights of businesses, consumers and individuals but also to prevent unfair competition on both sides.

TAIWAN PROPOSES HYDROFLUORIC ACID AS SUBSTANCE OF CONCERN

Taiwan EPA's Toxic and Chemical Substances Bureau (TCSB) is planning to classify hydrofluoric acid as a substance of concern and is expected to begin a public consultation by the end of January. If approved, it will become the second substance to be included in the CCS, following the addition of nitrous oxide in November. The list falls under the country's Toxic and Concerned Chemical Substances Control Act (TCCSCA), enacted in January 2019.

Hydrofluoric acid is typically used in semiconductor chip manufacturing, cleaning and rust removal, but there have been cases where it has been intentionally misused in oil and milk production in Taiwan.

In addition, if hydrofluoric acid is included in the list, any activity regarding manufacturing, production, import, sales, uses, warehousing and e-commerce will be prohibited without the approval of the competent authority.

The official announcement will be in July.

**KKIDIK (TURKISH REACH): LATE PREREGISTRATION
ACCEPTED BY TURKISH AUTHORITY ONLY EARLY
2021**

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKIDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH. One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government decided to accept late preregistration after the deadline.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
