## ECHA: PROPOSAL FOR THE RESTRICTION OF 2,4-DINITROTOLUENE IN THE ARTICLES

ECHA proposed a restriction on 2,4-dinitrotoluene in article. It is classified under Regulation (EC) No 1272/2008 (CLP) as a carcinogen category 1B, H350 (may cause cancer) and was therefore included in the candidate list for authorisation and into Annex XIV of REACH and it is used, for example, in car airbags and seat belts.

The proposed restriction applies to the placing on the market (import, sale and free supply) of 2,4-DNT in articles intended for consumption for certain professional uses in concentrations of 0.1% or more by weight. Explosives and ammunition for military use are not covered by the proposed restriction. Furthermore, it does not apply to articles governed by the Toys Directive (2009/48 / EC) or by the Medical Devices Regulation (2017/746 / EC).

## EUROPE: NEW RULES ON TATTOOS AND PERMANENT MAKEUP COME INTO FORCE

On January 5, the new rules for chemicals in tattoo colors and permanent makeup came into effect across Europe. The colors must also be labeled, among other things, with the ingredients in the ink.

In 2015, knowledge of the content of harmful chemicals in tattoo inks led to the preparation of a restriction proposal for chemicals in tattoo and permanent makeup inks. The purposes of the Regulation are to ensure the correct implementation of the restriction and to allow direct traceability in the event of adverse effects on health, the mixtures placed on the market throughout Europe.

## AMERICA: PROPOSITION 65 LIST UPDATED

On 24 December 2021, the updated list of chemicals known to cause cancer or reproductive toxicity was published by the State of California. The identification number shown in the list is the Chemical Abstracts Service (CAS) registry number. No CAS number is provided when several substances are presented as one element.

Chemicals underlined have recently been added, while chemicals or crossed out endpoints in ~~strikeout~~ have been removed.

## UK: LATE DUIN IS POSSIBLE

On 27th October the possibility to notify DUIN (Downstream Import Notification) in the UK expired. Companies that submitted their notifications for their substances in time to the HSE, will benefit from extended UK REACH registration deadlines as follows: 27 October 2023, 2025, and 2027 depending on the annual tonnage and the hazards of the substance. However, companies that have not notified their substances by the deadline and wish to continue importing EU REACH registered substances into the UK market at 1 tonne or more per year can still submit DUIN late notifications.

UK-based importers and UK-based only representatives appointed by non-UK suppliers (such as non-UK manufacturers / formulators) may submit DUIN notifications late. When the designated OR sends the late DUIN, the GB downstream users will be covered by this DUIN and will not have to send their own.

The HSE recommends doing this as soon as possible.

Our UK - BREXIT services cover the fulfillments of national regulations in the UK which will come into force after the release.

RNI srl provides the services listed for EU companies and for UK based companies:

- For national authorization applications still under evaluation in the UK, submitted by companies based in the EU, it is necessary that the latter appoint their own OR (based in the UK) by 31.12.2021 to continue the authorization process.
- LATE DUIN notification for GB importers of substances and mixtures **is possible after 27.10.2021**
- New UK REACH registrations according to new deadlines
- Compliance with new UK regulations (REACH, CLP; BPR, etc.)
- Exclusive Representation Services in UK for Italian / EU companies (OR service)

In collaboration with our partner LANDILEX, we also offer [legal consultancy](#).

## KKDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTHORITY ONLY EARLY 2021

**ACT NOW IF YOU LOST THE LAST DEADLINE**

In 2017, Turkey published and consolidated the text of the KKDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

**At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.**

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

### SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
