## USA: CALIFORNIA BANS PFAS IN PAPER-BASED FOOD PACKAGING

# BAN TOXIC PFAS

SACRAMENTO – California Governor Gavin Newsom signed a bill into law today banning the use of PFAS in paper-based food packaging and to require disclosure of toxic substances in cookware. The bill, AB 1200, known as the California Safer Food Packaging and Cookware Act of 2021 and authored by Assemblymember Phil Ting (D-San Francisco), will protect consumers and the environment from PFAS and other harmful chemicals by:

- Banning paper-based food packaging using PFAS chemicals starting January 1, 2023
- Requiring cookware manufacturers starting January 1, 2024, to disclose the presence of chemicals in their products that are of concern for human health or the environment
- Prohibiting misleading advertising on cookware packaging as early as January 1, 2023

## CHILE: PUBLISHED DRAFT REVISED CHILDREN'S PRODUCT SAFETY REGULATION

Chile's Ministry of Health is revising the children's product safety regulation that would set limits on substances, including phthalates, bisphenol A (BPA) and certain solvents. If approved, it will enter into force two years after its publication in the Official Gazette. The draft regulation would ban products containing substances classified as carcinogenic, mutagenic or toxic from import and sale in the country.

Chile's existing Regulation on Toy Safety (DS 114/2005) already controls certain substances in products. A separate regulation on school supplies also restricts the use of lead in paints and solvents in adhesive and glues. But there are no rules for substances in childcare products used for breastfeeding or sleeping. It would introduce a limit of 0.1% for certain phthalates, it would also set migration limits for some solvents and monomers and the limits for heavy metals remain unchanged from those set out in the existing regulation.

## KKIDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTHORITY ONLY EARLY 2021

**ACT NOW IF YOU LOST THE LAST DEADLINE**

In 2017, Turkey published and consolidated the text of the KKIDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

**At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.**

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

### SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
