## Newsletter RNI srl 12.02.2021

### OSHA AND GHS ALLIGMENT

OSHA has issued a long-awaited proposed rule that would update its regulations on hazard communication to align with the seventh version of the Globally Harmonized System of Classification and Labelling of Chemicals. The proposed rule is scheduled to be published in the Feb. 16 Federal Register.

OSHA expects the HCS update will increase worker protections and reduce the incidence of chemical-related occupational illnesses and injuries by further improving the information on the labels and Safety Data Sheets for hazardous chemicals. Moreover, proposed modifications will also address issues since implementation of the 2012 standard and improve alignment with other federal agencies and Canada.

## **PAKISTAN AND NATIONAL CHEMICALS POLICY**

The Pakistani Ministry of Climate Change (MoCC) will send a draft of the country's national chemical management policy to the prime minister for the approval. The final approval date is scheduled for April 2021.

This project will aim not only to control the chemicals that are imported and exported, but also the proper management of chemicals and waste in Pakistan.

The MoCC also issued the final Pakistan Persistent Organic Pollutants (POPs) Management Rules 2020 last September, to meet its obligations for manufacturing, handling and transporting these chemicals under the UN's Stockholm Convention. Moreover, it is also working towards adopting the UN's Globally Harmonized System (GHS) of classification and labelling of chemicals for this year or next year.

## **NONYLPHENOL AND ITS ETHOXYLATES RESTRICTED IN TEXTILES**

The restriction started to apply on 3 February 2021 and aims to reduce emissions of nonylphenol ethoxylates (NPEs) to our environment. When clothing and other textile articles containing these chemicals are washed, their residues are released into the environment through wastewater. NPEs are toxic to animals and plants living in our surface waters. The restriction will prevent 15 tonnes of NPEs from being released each year to surface waters and will reduce pressure on biodiversity.

## **HSE: PPP ACTIVE SUBSTANCE RENEWAL PROGRAMME**

All active substances with an expiry date before 31 December 2023 have been extended by 3 years. To support the renewal of approval in GB beyond the extended expiry date, HSE requires an application to confirm that the renewal of the active substance is being supported in GB:

- This must be submitted 3 years before the extended approval expiry date
- The supplementary dossier, including the supporting data, is required 30 months before the expiry of approval.

**KKIDIK (TURKISH REACH): LATE PREREGISTRATION  
ACCEPTED BY TURKISH AUTHORITY ONLY EARLY  
2021**

**ACT NOW IF YOU LOST THE LAST DEADLINE**

In 2017, Turkey published and consolidated the text of the KKIDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH. One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

**At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.**

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

#### **SEA UPDATES:**

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
