SOUTH KOREA: PUBLISHED ENGLISH LEAFLET FOR IMPLEMENTATION OF NEW MSDS RULES

On January 16, 2021, South Korea updated the MSDS rules. Because the Occupational Safety and Health Act (OSHA) and related supporting regulations that establish requirements for submitting MSDS and requesting CBI nondisclosure are in Korean, foreign companies have difficulty understanding compliance duties. So recently, the authority translated the leaflet, outlining the requirements to facilitate implementation, from Korean to English and made it accessible to a wider global audience.

AUSTRALIA: SWA UPDATES THE CLASSIFICATION OF HAZARDOUS CHEMICALS ON HCIS

In March 2021, the SWA updated the Hazardous Chemical Information System. This update modifies or updates the classification of 1219 hazardous substances and serves to complete the classification of substances by the IMAF program, which evaluates the human health and environmental impacts of industrial chemicals listed in the inventory of industrial chemicals (AIIC).

POSSIBLE REFUSAL OF MOCA AUTHORIZATION, POLYURETHANE PRECURSOR

The application for refusal of authorization for the uses of the carcinogen MOCA in the production of polyurethane is being evaluated.

The SEAC evaluation came after last year the Commission retroactively requested additional substitution plan reports on 12 authorization applications, including one for MOCA (2,2'-dichloro-4,4'-methylenedianiline) which covers all the downstream uses of the hardener in the European Economic Area.

The Commission is expected to issue its decision around January 2022, taking into account both the 2017 ECHA opinion and the SEAC addendum on replacement. While the application has a narrow description of use as a curing agent and chain extender in the production of cast polyurethanes, the manufactured products are used in a variety of industries ranging from aerospace, automotive, ceramics, paper and pulp, packaging, steel, iron and aluminum. The specific use of MOCA may also meet new criteria for intermediates that emerged after a court ruling on acrylamide.

If the Commission refuses the authorization, all downstream users will have to stop production immediately.

Our UK - BREXIT services cover the fulfillments of national regulations in the UK which will come into force after the release.

RNI srl provides the services listed for EU companies and for UK based companies:

- Legal entity change to other offices / companies IN EU by 31.12.2020
- Grandfathering for GB legal entities and EU REACH registrations in the UK
- DUIN notification for GB importers of substances and mixtures

KKIDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTHORITY ONLY EARLY 2021

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKIDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
