MEXICO: BAN ON ANIMAL TESTING IN COSMETICS

On September 2, the Mexican Senate approved a bill that will prohibit the production, import and marketing of cosmetic products, or those that contain ingredients or combinations thereof, that have been tested on animals. The bill will come into effect upon its publication in the Mexican Official Gazette.

Manufacturers will have two years to find alternative methods to assess the safety and efficacy of cosmetic products and will have to report on the packaging that no animal tests have been conducted.

KKDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTORITHY ONLY EARLY 2021

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
