DELEGATED REGULATION 2020/1182 (15th ATP)

In May 2020, the Delegated Regulation 2020/1182 entered into force, amending, for the purposes of adapting to technical and scientific progress, Annex VI, part 3, of Regulation (EC) no. 1272/2008 of the European Parliament and of the Council on the classification, labeling and packaging of substances and mixtures.

It applies from 1 March 2022 with the exception that substances and mixtures may, before 1 March 2022, be classified, labeled and packaged in accordance with Regulation (EC) No. 1272/2008 as amended by this regulation.

EUROPEAN COMMISSION: RESORCINOL ADDED TO THE CANDIDATE LIST

After a long controversy that began in 2020, resorcinol has been identified as SVHC due to its properties as an endocrine disruptor and will be included in the list of SVHCs by ECHA. It is a high-volume compound used to make tires, rubber products, adhesives and industrial resins, as well as some cosmetics and medical products, and has been identified as SVHC due to its effects on the thyroid.

The procedure - a last-ditch effort by the Commission to get its draft implementing decision passed, despite persistent objections from some Member States - resulted in 19 countries voting for and three against, with five abstentions. Those in favour represented 54% of the EU population, below the 65% threshold required for qualified majority voting. However, the vote was approved on the basis that only three Member States voted against, fewer than the minimum four which constitute a "blocking minority" within the meaning of Article 16 of the Treaty on European Union (TEU).

LUXEMBOURG: NOT ALL DISINFECTANTS COMPLY WITH THE LAW ON BIOCIDES

A survey by the Luxembourg environmental agency found that 65% of the 401 disinfectants on the market last year did not comply with the country's biocide legislation.

The agency found that 259 disinfectants were on the market illegally. Most of these did not have the appropriate national authorization. Luxembourg imposes its national legislation on biocidal products containing an active substance which is still under revision in the EU Biocidal Products Regulation (BPR). This is a common practice among Member States and allowed by the "transitional provisions" of the BPR.

Most of the non-compliant products found by the environmental agency contained ethanol, which is still under review for BPR product types one, two and four. Other problems included unauthorized products and illegal substances, as well as inadequate information on product labels.

All products identified as non-compliant were withdrawn from the market until the stores had met all the necessary requirements.

UK: LATE DUIN IS POSSIBLE

On 27th October the possibility to notify DUIN (Downstream Import Notification) in the UK expired. Companies that submitted their notifications for their substances in time to the HSE, will benefit from extended UK REACH registration deadlines as follows: 27 October 2023, 2025, and 2027 depending on the annual tonnage and the hazards of the substance. However, companies that have not notified their substances by the deadline and wish to continue importing EU REACH registered substances into the UK market at 1 tonne or more per year can still submit DUIN late notifications.

UK-based importers and UK-based only representatives appointed by non-UK suppliers (such as non-UK manufacturers / formulators) may submit DUIN notifications late. When the designated OR sends the late DUIN, the GB downstream users will be covered by this DUIN and will not have to send their own.

The HSE recommends doing this as soon as possible.

Our UK - BREXIT services cover the fulfillments of national regulations in the UK which will come into force after the release.

RNI srl provides the services listed for EU companies and for UK based companies:

- For national authorization applications still under evaluation in the UK, submitted by companies based in the EU, it is necessary that the latter appoint their own OR (based in the UK) by 31.12.2021 to continue the authorization process.
- LATE DUIN notification for GB importers of substances and mixtures **is possible after 27.10.2021**
- New UK REACH registrations according to new deadlines
- Compliance with new UK regulations (REACH, CLP; BPR, etc.)
- Exclusive Representation Services in UK for Italian / EU companies (OR service)

In collaboration with our partner LANDILEX, we also offer [legal consultancy](#).

KKDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTHORITY ONLY EARLY 2021

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
