**NEW INDICATIONS ON HARMONIZED MARKING ON
SINGLE-USE PLASTIC PRODUCTS**

The 2020/2151 Regulation published in G.U.C.E. on 18 December 2020, deals with the provisions relating to the harmonized marking specifications for single-use plastic products listed in part D of the annex to EU directive 2019/904 of the European parliament and of the Council on the reduction of the incidence of certain products in the environment.

In particular, the new provisions concern:

- Sanitary towels, tampons and applicators for tampons;
- The wet wipes;
- Filtered tobacco products and filters marketed for use in combination with tobacco products;
- Cups and glasses for drinks.

REGULATION (EU) 2019/1148 RELATING TO THE PLACEMENT ON THE MARKET OF EXPLOSIVES PRECURSORS

On February 1, 2021, Regulation (EU) 2019/1148, published in June 2019, relating to the placing on the market of explosives precursors, will come into force. This new regulation aims to prevent the illicit manufacture of explosives by limiting the access and use of precursors by private individuals, encouraging the reporting of suspicious transactions along the entire supply chain. The new rules will limit private access to restricted substances: for example, Sulfuric Acid cannot be sold to the public if present in a mixture at a concentration greater than 15% w / w.

Each Member State will have to establish a licensing system to regularize the purchase and possession of certain substances precursors of explosives by the citizen.

Furthermore, the rules will apply to both online and offline purchases.

RESTRICTION OF TDFA IN SPRAYS

The European Commission has adopted an amendment to Annex XVII of CLP which limits the use of TDFA in spray products. According to the regulation, the substance cannot be used in aerosol dispensers and

pump sprays, supplied to the public after January 2, 2021, in a concentration equal to or greater than two parts per billion by weight of mixtures containing organic solvents. In addition, products must be marked as "for professional use only" and "fatal if inhaled" (H330) with a Globally Harmonized System pictogram.

FREE TRADE AGREEMENT SIGNED BETWEEN TURKEY AND UK

On 1 January 2021, the free trade agreement between Turkey and the United Kingdom came into force, which affects the automotive, steel, agricultural and manufacturing sectors.

The new agreement seems to replicate the trading terms of the previous pact, with duty-free trade for all non-agricultural products. It also contains a review clause within the next two years to consider further services, including digital ones, and more liberal trade and agriculture regulations.

**KKIDIK (TURKISH REACH): LATE PREREGISTRATION
ACCEPTED BY TURKISH AUTHORITY ONLY EARLY
2021**

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKIDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH. One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government decided to accept late preregistration after the deadline.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
