## BARBADOS: STANDARD ACT

This law establishes the framework for issuing, regulating and implementing standards for product compliance in Barbados and ensures that products sold and marketed comply with standards issued by the Barbados National Standards Institution (BNSI) or the Organization regional for Caribbean Community and Common Market (Caricom) standards and quality.

The law also specifies the labeling and marking requirements for products and goods sold in Barbados. All product labels must be in English and must conform to standards as specified by the BNSI.

## EU: MODIFICATION OF THE REGULATION OF DUAL-USE PRODUCTS

© CanStockPhoto.com - csp11730662

The Delegated Regulation (EU) 2022/1 of 20 October 2021 amends Regulation (EU) 2021/821 of the European Parliament and of the Council as regards the list of dual-use items.

In this Regulation, the list of dual-use products included in Annex I of Regulation (EU) 2021/821 is updated to ensure full compliance with international safety obligations, guarantee transparency and maintain the competitiveness of economic operators as well as Annex IV of Regulation (EU) 2021/821 that sets out the authorization requirements for certain transfers within the Union.

## ANSES: EVALUATION OF 106 PRIORITY SUBSTANCES USED IN ELECTRONIC CIGARETTES

The French Agency for Food, Environmental and Occupational Health and Safety (Anses) has published a list of 106 substances used in e-cigarettes or vaping products, which it will prioritize for evaluation, due to health problems Human.

The agency has drawn up a list of 1,775 substances present in electronic cigarettes, 106 of which it considers priority due to their dangerousness: carcinogenic, mutagenic, toxic for reproduction, etc. These include, for example, formaldehyde, acrolein or even lead.

ANSES notes that nicotine-free vaping e-liquids and especially the ingredients of "homemade" products are not covered by regulatory measures, such as reporting obligations, which affect commercially available nicotine-containing e-liquids.

EU regulations should therefore be extended to all vaping liquids, regardless of whether they contain nicotine, as well as ingredients sold separately for users to formulate at home.

### UK: LATE DUIN IS POSSIBLE

On 27th October the possibility to notify DUIN (Downstream Import Notification) in the UK expired. Companies that submitted their notifications for their substances in time to the HSE, will benefit from extended UK REACH registration deadlines as follows: 27 October 2023, 2025, and 2027 depending on the annual tonnage and the hazards of the substance. However, companies that have not notified their substances by the deadline and wish to continue importing EU REACH registered substances into the UK market at 1 tonne or more per year can still submit DUIN late notifications.

UK-based importers and UK-based only representatives appointed by non-UK suppliers (such as non-UK manufacturers / formulators) may submit DUIN notifications late. When the designated OR sends the late DUIN, the GB downstream users will be covered by this DUIN and will not have to send their own.

The HSE recommends doing this as soon as possible.

Our UK - BREXIT services cover the fulfillments of national regulations in the UK which will come into force after the release.

RNI srl provides the services listed for EU companies and for UK based companies:

- For national authorization applications still under evaluation in the UK, submitted by companies based in the EU, it is necessary that the latter appoint their own OR (based in the UK) by 31.12.2021 to continue the authorization process.
- LATE DUIN notification for GB importers of substances and mixtures **is possible after 27.10.2021**
- New UK REACH registrations according to new deadlines
- Compliance with new UK regulations (REACH, CLP; BPR, etc.)
- Exclusive Representation Services in UK for Italian / EU companies (OR service)

In collaboration with our partner LANDILEX, we also offer [legal consultancy](#).

## KKDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTORITHY ONLY EARLY 2021

**ACT NOW IF YOU LOST THE LAST DEADLINE**

In 2017, Turkey published and consolidated the text of the KKDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

**At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.**

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

### SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
