EPA: TSCA REQUIREMENTS FOR EU COMPANIES

On January 6, 2021, the US Environmental Protection Agency (EPA) announced new substance restrictions under the US Toxic Substances Control Act of 1976 (TSCA). Furthermore, from 8 March 2021, the final rules of section 6 require companies to identify the presence of five new restricted substances in their products and to communicate this to their customers in the US market. Any company operating in or selling into the U.S. is in scope of TSCA and subject to its enforcement penalties.

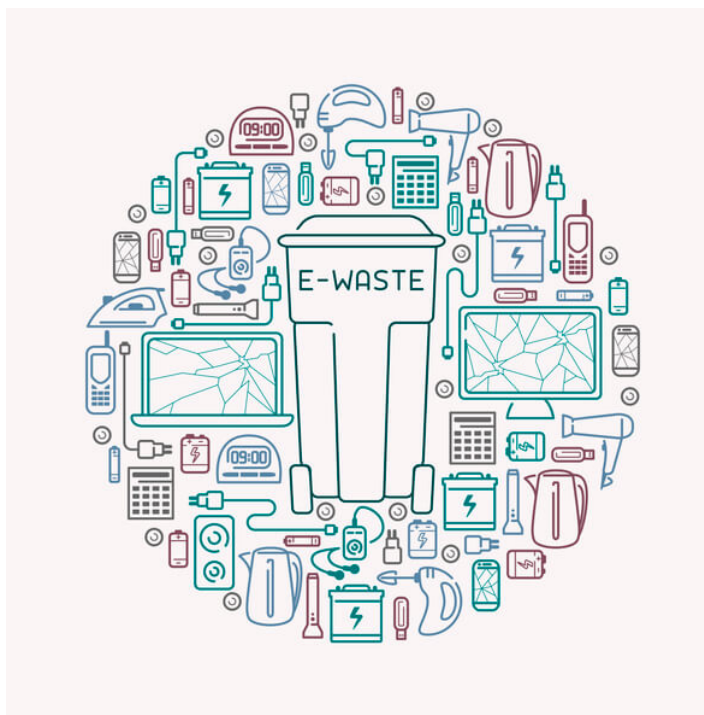

The 5 restricted substances are:

- Phenol, isopropylated phosphate (3: 1) (PIP 3: 1).
- Decabromodiphenyl ether (decaBDE).
- 2,4,6-tris (tert-butyl) phenol (2,4,6-TTBP).
- Hexachlorobutadiene (HCBd).
- Pentachlorothiophenol (PCTP).

The new rules require detailed composition information and companies will need to request all necessary information from their suppliers. EU-based suppliers of companies operating in the United States may receive requests to provide all data to meet TSCA requirements.

EEE: NEW DEROGATION ON LEAD

On 10th May the derogation from the ban on the use of lead in electrical and electronic initiators of explosives for civil use will come into force. In fact, Directive (EU) 2021/647 has been published in the European Journal which amends Annex III of Directive 2011/65 / EU, on the exemption relating to the use of certain substances, adapting it to scientific and technical progress. dangerous in electrical and electronic equipment.

In particular, the measure - for a period of 5 years - allows the use of lead diazide, lead styphnate, lead dipicramate, orange lead (lead tetroxide), lead dioxide present in electrical initiators and electronic explosives for civil (professional) use, and barium chromate used in the long-delay charges of electric and electronic initiators of explosives for civil (professional) use.

Member States have until 31 October 2021 to adopt and publish 'the laws, regulations and administrative provisions necessary to comply with the directive' and must apply them from 1 November 2021.

EU: AMENDMENT OF PART I ANNEX VI OF THE CLP

The European Commission has updated some of the official notes for the identification, classification and labeling of hazardous substances and mixtures. With the publication of Regulation (EU) no. 2021/643, part 1 of Annex VI, of Regulation (EC) no. 1272/2008 (CLP), in the section "Introduction to the list of harmonized classifications and labeling", replacing the notes from "J" to "R" (concerning, among others, substances such as "benzene", "dimethyl sulfoxide", and "benzo [a] -pyrene"), and "improving the wording" of the notes regarding "formaldehyde".

KKIDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTHORITY ONLY EARLY 2021

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKIDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
