EURASIA: REACH UPDATES

The image shows the flag of the Eurasian Union, which consists of a white top section, a blue middle section, and a red bottom section. The text 'EURASIA REACH' is centered in white on the blue section.

EURASIA REACH

On February 17, 2021, the Eurasian Economic Commission (EEC) published a new draft versions of the second tier implementing Regulations under the Technical Chemical Safety Regulation TR041 ("Eurasia REACH"). These Regulations, namely Inventory Formation Order (and Annexes), New Substance Notification Order (and Annexes) and updated EEC Decision, must be approved before Eurasia REACH can enter into force. Documents in the Russian language can be found [here](#).

According to the CIS Center, a significant addition has been made to Annex 7 ("Restricted Substances") of the Inventory Formation Order.

The new version of the EEC decision is postponing some dates, which could theoretically also indicate the probable postponement of the start date of REACH Eurasia. At the moment, however, the date of entry into force of REACH Eurasia remains unclear and will be clarified once the 2nd level legislation is approved.

It is possible to participate in the public consultation for the new versions of the 2nd level legislation by submitting a questionnaire published on the EEC website together with the new versions of the implementing regulations. The public consultation begins on 18 February and will end on April 1, 2021.

POPS: LESS RESTRICTIONS FOR PFOAS

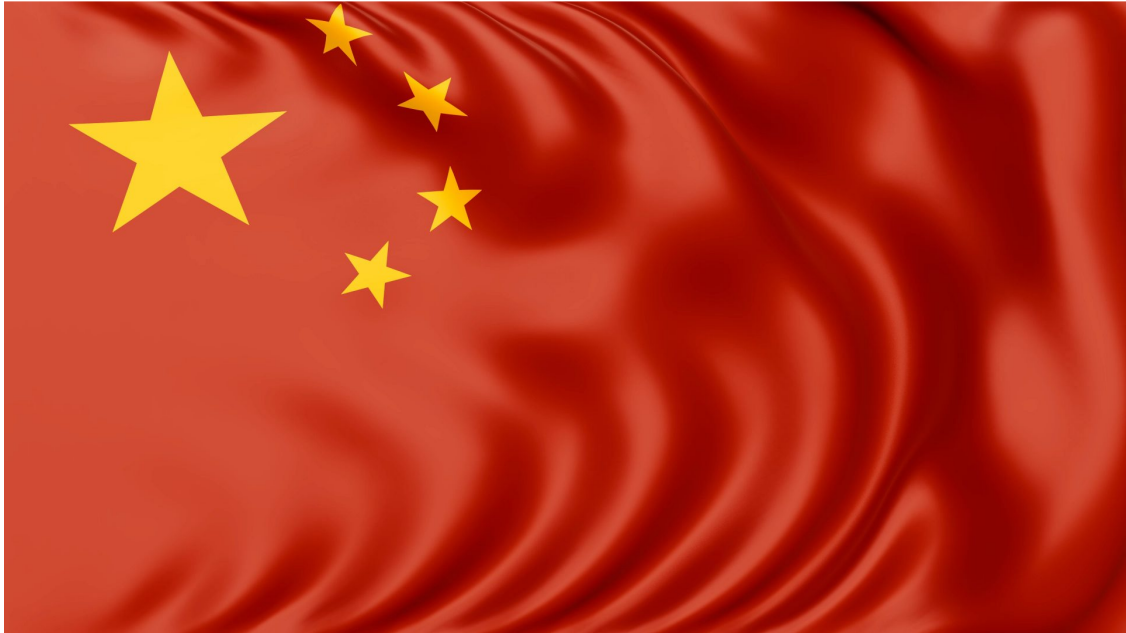

It will be possible to produce medical devices, with the exception of implantable and invasive ones, with the presence of PFOA equal to or less than 2 mg / kg; moreover, the limit of 400 kilogray linked to the unintentional release level of trace contaminant for polytetrafluoroethylene (PTFE) powders produced by ionizing radiation is stopped. The European Commission has amended Annex I of Regulation (EU) 2019/1021 (or the "Pop Regulation") regards PFOA, its salts and PFOA-related compounds. The new Regulation will come into force on 22 February.

CHINA: REGULATION ON PLASTIC PRODUCTS

On February 1, the General Rules for Evaluating Easy-to-Collect and Easy-to-Recycle Plastic Product Designs came into force. Formulated by members of the Green Recycled Plastic Supply Chain Joint Working Group (GRPG) and published by the China National Resources Recycling Association, China starts this project with the aim of maximizing the recycling and high-value use of plastic waste in China. China is the largest producer and consumer of plastic in the world, although much has been done in recent years: in fact, over 30% of plastic waste has been recycled.

The General Rules provide the system of indicators and methodology for evaluating 2E designs of plastic products and can be used to guide the design and evaluation of plastic products. In particular, it does not apply to degradable plastic products and plastic products listed in the national inventory of hazardous waste. In the next step, specific implementing rules targeting different sectors, including beverage packaging, dairy packaging, etc. will be formulated and published to facilitate industry compliance.

**KKIDIK (TURKISH REACH): LATE PREREGISTRATION
ACCEPTED BY TURKISH AUTHORITY ONLY EARLY
2021**

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKIDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH. One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
