## SOUTH KOREA:PRE-REGISTERED 17096 SUBSTANCES

South Korea's Ministry of Environment (MoE) published the updated list of pre-registered substances under K-REACH. So far, a total of 190,721 pre-registration applications have been submitted for 17,096 existing chemical substances, of which 78 are CMR substances. About 11% of the pre-registered substances are manufactured or imported over 1,000 tonnes per year. For each pre-registered existing chemical substance, the MoE provides information including:

- KE number, CAS number and chemical name
- number of applications for pre-registration;
- the maximum tonnage band (1-10t/y: 6,767 substances; 10-100t/y: 5,658 substances; 100-1000t/y: 2,796 substances; Above 1000: 1,875 substances);
- if it is a CMR substance;
- if consumer uses apply; and
- hazard classification information.

## EFSA: NEW GUIDELINES ON SMOKE FLAVOURINGS PRIMARY PRODUCTS

Food products smoking process is a method of preserving and flavouring food that uses the substances present in the smoke generated by the combustion of wood (for example oak, chestnut, thyme, bay leaf). It can be performed at temperatures between 85 ° C and 20 ° C and can take a different timeframe which can vary from a few hours to several days, making the process complex and expensive.

A valid alternative to the smoking process is represented by the use of smoke flavourings, or complex mixtures produced by "pyrolysis" which are applied to the food by nebulization, injection, immersion or showering.

Smoke flavourings, before being produced, used and / or placed on the market, must be subjected to an assessment of their safety to avoid potential adverse effects on health and the environment. To this end, EFSA has published a guide that illustrates the scientific data that applicants must include in the application for authorization for new smoke flavourings and for the renewal and / or modification of authorizations in force.

The authorization of a smoke flavouring is valid for 10 years and its renewal must be requested at least 18 months before the expiry date.

## ECHA: ART 55 DEROGATION OF REGULATION 528/2012 IN SWEDEN

On 3 March the Swedish Chemicals Agency issued a derogation based on Article 55 of Regulation (EU) no. 528/2012 which allows the placing on the market and use of disinfectants with the active ingredients and types of product listed above. The waiver includes the following general conditions:

- The person responsible for making them available must ensure that the instructions are attached to the package. The instructions must ensure that sufficient disinfecting effect is achieved when using the products.
- Sales to the public can only be made through pharmacies or grocery stores.

For disinfectants with 1- propanol and 2-propanol, the specific conditions are:

- For surface disinfection: min 45 vol-%
- For hand disinfection: min 60 vol-%

The specific conditions for disinfectants with active chlorine and hydrogen peroxide concern the public sales of disinfectants in PT 1 and can only be made on ready-to-use solutions.

## KKIDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTHORITY ONLY EARLY 2021

**ACT NOW IF YOU LOST THE LAST DEADLINE**

In 2017, Turkey published and consolidated the text of the KKIDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

**At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.**

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

### **SEA UPDATES:**

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
