RNI has activated the transmission service with digital certification of regulatory practices for Spanish authorities.

RNI can be found on pages 202 and 203 of Chemical Watch's Global Service Providers Guide 2021, at the following [link](#)

ECHA & ESFA: GLYPHOSPHATE REVIEWS

ECHA and the European Food Safety Authority (EFSA) have received a draft assessment of glyphosate carried out by four EU Member States (France, Hungary, the Netherlands and Sweden) and will begin to consider the results.

Glyphosate currently has a harmonized classification as a cause of serious eye damage and as toxic to aquatic life with long-lasting effects, before and after ECHA's assessment in 2017. No classification was justified for germ cell mutagenicity, carcinogenicity or reproductive toxicity. The current proposal of the four Member States does not foresee any changes to the existing classification.

Glyphosate, the most widely used herbicide in the world, is currently authorized for use in the EU until December 2022. Once ECHA and ESFA give their opinions, the European Commission will decide whether or not to renew the glyphosphate.

CHINA: INCLUSION OF 8 NEW SUBSTANCES IN THE IECSC

On June 15, 2021, the Chinese Ministry of Ecology and Environment (MEE) issued a consultation notice on the inclusion of 8 chemicals in the Inventory of Existing Chemicals (IECSC). According to the MEE order n. 12, a permanent integration window was opened for chemicals that had been manufactured, sold, used in processing or imported into China before October 15, 2003.

The consultation will end on June 28, 2021.

KKIDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTHORITY ONLY EARLY 2021

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKIDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
