EU: CONSULTATION ON THE REVISION OF REACH REGULATION 1907/2006

The European Commission has opened a public consultation on the revision of the Regulation on Registration, Evaluation, Authorization and Restriction of Chemicals (REACH). The review will aim to align EU chemical standards with the Commission's ambition for safe and sustainable chemicals and a high level of health and environmental protection, while preserving the internal market.

The Commission invites citizens and interested parties to express opinions on several elements including the revision of registration requirements in polymers.

The consultation started on January 20 will last until mid-April 2022.

ECHA: ADDED 4 NEW SUBSTANCES IN THE CANDIDATE LIST

The list of substances of very high concern currently contains 233 items.

The 4 added substances are:

- 6,6'-di-tert-butyl-2,2'-methylenedi-p-cresol
- trio (2-methoxyethoxy) vinylsilane
- (±) -1,7,7-trimethyl-3 - [(4-methylphenyl) methylene] bicyclo [2.2.1] heptan-2-one covering any of the individual isomers and / or combinations thereof (4-MBC)
- S- (tricyclo (5.2.1.02,6) deca-3-en-8 (or 9) -yl O- (isopropyl or isobutyl or 2-ethylhexyl) O- (isopropyl or isobutyl or 2-ethylhexyl) phosphorodithioate

Of the 4 substances included, one is used in cosmetics and has been added to the list as hormone-disrupting properties in humans. Two are used in rubbers, lubricants, and sealants, and have been included because they negatively affect fertility. The fourth substance is used in lubricants and greases and has been added as it is persistent, bioaccumulative and toxic, therefore harmful to the environment.

Remember that under the REACH regulation, companies have legal obligations when their substance is included - alone, in mixtures or in articles - in the Candidate List.

MOROCCO: PESTICIDE MANAGEMENT

Morocco, a developing country, also should face problems caused by pesticides on public health and hygiene (PHHP).

The Government of Morocco has decided to proceed with a three-year United Nations Environment (UNEP) "Chemicals and Waste Management Program" project to strengthen its institutional capacity to manage PHHPs to fulfill its obligations as a part of the Conventions of Basel, Rotterdam, Stockholm and Minamata.

Morocco's Pesticide Assessment Technical Committee, which plays a key role in pesticide regulation, has not received the training and technical support to fulfill its responsibilities. Therefore, lack of up-to-date knowledge on best practices for pesticide management has opened an avenue for hazardous pesticides to be imported and used widely within the country. The first goal of the project is to strengthen the capacity of the Technical Pesticide Assessment Committee so that it can better safeguard public health. In this way, committee members can update the Moroccan procedure for authorizing the import, production and marketing of PHHP formulations also by private companies.

UK: LATE DUIN IS POSSIBLE

On 27th October the possibility to notify DUIN (Downstream Import Notification) in the UK expired. Companies that submitted their notifications for their substances in time to the HSE, will benefit from extended UK REACH registration deadlines as follows: 27 October 2023, 2025, and 2027 depending on the annual tonnage and the hazards of the substance. However, companies that have not notified their substances by the deadline and wish to continue importing EU REACH registered substances into the UK market at 1 tonne or more per year can still submit DUIN late notifications.

UK-based importers and UK-based only representatives appointed by non-UK suppliers (such as non-UK manufacturers / formulators) may submit DUIN notifications late. When the designated OR sends the late DUIN, the GB downstream users will be covered by this DUIN and will not have to send their own.

The HSE recommends doing this as soon as possible.

Our UK - BREXIT services cover the fulfillments of national regulations in the UK which will come into force after the release.

RNI srl provides the services listed for EU companies and for UK based companies:

- For national authorization applications still under evaluation in the UK, submitted by companies based in the EU, it is necessary that the latter appoint their own OR (based in the UK) by 31.12.2021 to continue the authorization process.
- LATE DUIN notification for GB importers of substances and mixtures **is possible after 27.10.2021**
- New UK REACH registrations according to new deadlines
- Compliance with new UK regulations (REACH, CLP; BPR, etc.)
- Exclusive Representation Services in UK for Italian / EU companies (OR service)

In collaboration with our partner LANDILEX, we also offer [legal consultancy](#).

KKDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTORITHY ONLY EARLY 2021

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
