## EUROPEAN COMMISSION: REVISION OF THE COSMETIC PRODUCTS REGULATION

The Cosmetic Products Regulation will be subject to a targeted revision, alongside other chemicals legislation including the REACH Regulation and CLP Regulation. The purpose of this impact assessment is to review some of the provisions of the Cosmetic Products Regulation in light of the objectives of Chemicals Strategy for Sustainability (CSS).

## USA: EPA RELEASED UPDATED 2020 TOXICS RELEASE INVENTORY (TRI) DATA

EPA has made available updated 2020 Toxics Release Inventory (TRI) data about chemical releases, chemical waste management, and pollution prevention activities that took place during 2020 at more than 21,000 federal and industrial facilities throughout the United States and its territories. This dataset builds on the preliminary data released in July. It includes revised and late submissions from facilities, and additional data quality checks by EPA.

**ECHA: MEETING OF THE BIOCIDAL PRODUCTS COMMITTEE (BPC)**

On 19<sup>th</sup> October 2021, ECHA's Biocidal Products Committee (BPC) established that d-allethrin should not be approved for product-type 18. The committee considered that the toxicological test data presented in the dossier submitted does not sufficiently match the profile of d-allethrin currently placed on the market.

The committee adopted a positive opinion approving the active substance BIT for product-types 6 (preservatives for products in storage) and 13 (working or cutting fluid preservatives).

The committee also adopted positive opinions for nine applications for Union authorisation for:

- L(+) lactic acid for product-type 2 (disinfectants and algicides not intended for use directly on people or animals);
- active chlorine released from sodium hypochlorite for product-types 2, 3 (veterinary hygiene), 4 (food and feed area) and 5 (drinking water) and release from calcium hypochlorite (for product-types 2, 4 and 5);
- propan-1-ol and propan-2-ol (for various product types);
- hydrogen peroxide for product-types 2, 3 and 4; and
- cyromazine for product-type 18.

The European Commission together with the EU Member States will take the final decision on approval of active substances and on Union authorisation of biocidal product families.

## KKIDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTHORITY ONLY EARLY 2021

**ACT NOW IF YOU LOST THE LAST DEADLINE**

In 2017, Turkey published and consolidated the text of the KKIDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

**At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.**

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

### SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
