ECHA: TREATED ARTICLES

The Biocidal Products Regulation (BPR) sets rules for the use of articles treated with, or intentionally incorporating, one or more biocidal products. According to the regulation, articles can only be treated with biocidal products containing active substances approved in the EU. This is a change from the Biocidal Products Directive (repealed by the BPR from 1 September 2013), where articles imported from third countries could be treated with substances not approved in the EU – such as, sofas and shoes containing DMF. Companies must also be ready to provide the consumers with information about the biocidal

treatment of the article they are selling. If a consumer requests information about a treated article, the supplier must provide it free of charge within 45 days.
For the active substances allowed in treated articles press [here](#)

IUCLID AND PLANT PROTECTION PRODUCTS

In March, the IUCLID platform will also be mandatory for plant protection products. The EU regulation 2020/1740 in fact provides that - starting from March 27th, all dossiers relating to active substances (new submissions and renewals of those approved until March 27th 2024) will be presented in IUCLID format. The same format will also be mandatory for the transmission of requests for revision of the Maximum Residual Limits.

HSE: BIOCIDES

Applications for GB product authorisation, active substance approval and GB Article 95 suppliers should be made direct to HSE (not via R4BP) using application forms and systems. Details of each of the application processes including application forms and supporting documents can be found on HSE website. A list of all the GB BPR application forms and templates can be found [here](#)

It is also accepted the EU version of the applicable supporting document e.g. the draft Product Assessment Report (PAR), Summary of Product Characteristics (SPC) (including meta SPC) and active substance draft Risk Assessment Report (RAR) for applications that need to be resubmitted in GB.

**KKIDIK (TURKISH REACH): LATE PREREGISTRATION
ACCEPTED BY TURKISH AUTHORITY ONLY EARLY
2021**

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKIDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH. One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
