ECHA: INTENTION TO RESTRICT PER AND POLYFLUOROALKYL SUBSTANCES (PFAS)

Denmark, Germany, the Netherlands, Norway and Sweden have presented their intention to restrict the production, placing on the market and use of per- and polyfluoroalkyl substances (PFAS). Their restriction proposal is expected to be presented on July 15, 2022. The five countries have launched a survey on PFAS and their alternatives and are seeking more information on the planned restriction.

VIETNAM: AMENDMENT OF DECREE N.133 / 2017 / ND-CP ON CHEMICAL PRODUCTS

On 9 July 2021, the Chemical Agency of Vietnam under the Ministry of Industry and Trade (MOIT) issued a press release to collect opinions on the modification and integration of the articles of the Decree n.133 / 2017 / ND-CP: Detailed regulation and guidelines on the implementation of a number of articles of the Chemicals Act. The public can submit their comments on the draft amendment on the website, where the draft, the introduction of the amendment and the basic documents of the amendment (in Vietnamese) can be downloaded.

EFSA: PUBLIC CONSULTATION ON THE SAFETY OF DIETARY SUGARS

Five European countries (Denmark, Finland, Iceland, Norway and Sweden) asked EFSA to update a 2010 assessment and to review the latest scientific literature on the links between sugar intake and various diseases, e.g. obesity, diabetes type II, cardiovascular disease, gout, dental caries. Requesting countries asked if it was possible to establish a science-based breakpoint – called "Tolerable Upper Intake Level" (UL) for nutrients – for total dietary sugars, below which consumption would not cause health problems. After screening more than 30,000 publications, EFSA scientists concluded that it is not possible to set such a threshold. However, there is certainly a correlation between the intake of different categories of sugars and the risk of developing chronic metabolic diseases and dental caries. This information is intended to assist EU Member States in setting targets for populations and / or recommendations for individuals in their country. The draft opinion includes an EU-wide intake model to estimate dietary sugar consumption on a country-by-country and a more detailed picture of the main food categories that contribute to dietary sugar intake.

KKDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTHORITY ONLY EARLY 2021

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
