**RNI has activated the transmission service with digital certification of regulatory practices for Spanish authorities.****RNI can be found on pages 202 and 203 of Chemical Watch's Global Service Providers Guide 2021, at the following [link](#)****In order to verify the VAT number associated with the UFI code in most European countries, press [here](#)**

EUROPEAN COMMISSION: POTENTIAL CHANGES TO DETERGENTS REGULATION

The EU Detergents Regulation could require stricter requirements for surfactants and more substances to fall within its scope, or even could be repealed and incorporated into other chemicals legislation, according to an initial impact assessment by the European Commission (IIA) outlining potentially significant changes to the law.

The Commission proposes to:

- clarify the scope and definitions of the regulation;
- to consider additional requirements for detergents, such as the widening of the limitations on phosphorus or the requirements for certain harmful substances not currently covered by the regulation;
- improve the coherence of the regulatory framework for detergents by addressing overlaps and inconsistencies with REACH, CLP and biocides regulations; And
- Consider revising or repealing the Detergents Regulation and incorporating its provisions into other EU chemicals legislation.

WHO: PUBLISHED THE UPDATE TO GLOBAL AIR QUALITY GUIDELINES

World Health Organization

The World Health Organisation (WHO) has published an update to its Global Air Quality Guidelines (AQGs), which provide thresholds and limits for key pollutants that pose a risk to health. The European Environmental Bureau (EEB) welcomes the new guidelines, that are meant to help protect human health, the environment and climate from dangerous air pollutants.

They offer guidance for legislation and policies to curb air pollution and decrease the burden of disease resulting from exposure to toxic air worldwide. The key pollutants covered by the guidelines are particulate matter (PM2.5 and PM10), ozone (O3), nitrogen dioxide (NO2), sulphur dioxide (SO2) and carbon monoxide (CO).

ECHA: NEW GUIDE AVAILABLE ON CLASSIFYING AND LABELLING TITANIUM DIOXIDE

Starting from 1 October 2021, following the Delegated Regulation (EU) 2020/2017, new classification and labelling requirements for titanium dioxide come into force.

The substance TiO₂ must be classified as carcinogen if inhaled (Carc. 2, H351 (inhalation) when supplied on its own or in mixtures, where the substance or mixture contains 1 % or more of TiO₂ particles with an aerodynamic diameter ≤10 μm. In addition, mixtures containing TiO₂ must be labelled with the supplemental label element 'Hazardous respirable dust may be formed when used. Do not breathe dust' (EUH212). Non-classified solid mixtures must also be labelled with the EUH212 supplemental labelling element if they contain at least 1 % of TiO₂, regardless of their form, or particle size. Liquid mixtures containing TiO₂ do not require Carc. 2 classification. However, if they contain at least 1 % of TiO₂ particles with an aerodynamic diameter ≤10 μm, then they need to be labelled with the supplemental label element 'Hazardous respirable droplets may be formed when sprayed. Do not breathe spray or mist' (EUH211).

KKDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTHORITY ONLY EARLY 2021

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
