**RNI has activated the transmission service with digital certification of regulatory practices for Spanish authorities.****RNI can be found on pages 202 and 203 of Chemical Watch's Global Service Providers Guide 2021, at the following [link](#)****In order to verify the VAT number associated with the UFI code in most European countries, press [here](#)**

BRAZIL: REGULATION FOR CHECKING THE CONFORMITY OF PRODUCTS OF VEGETABLE ORIGIN

The MAPA ordinance no. 375 of 12 August 2021 establishes the requirements and criteria to facilitate and harmonize the procedures for checking the conformity of products of plant origin which have officially established identity and quality requirements, international standards, standards required by importing countries or private standards recognized by the Ministry of agriculture, breeding and procurement.

For more information regarding ordinance no. 375 press [here](#)

TAIWAN: HYDROFLUORIC ACID AND AMMONIUM NITRATE ADDED TO THE LIST OF SUBSTANCES OF CONCERN

The Taiwan EPA's Toxic and Chemical Substances Bureau (TCSB) has added hydrofluoric acid and ammonium nitrate to the list of substances of concern (CCS). The restrictions on these substances will affect all companies that produce, import, sell, transport, use and store them.

Production, import, sale, use and storage activities must be approved by the EPA before the deadlines of 1 August 2022 for ammonium nitrate; and of 1 February 2023 for hydrofluoric acid. Firms must also record operating volumes on a daily basis and report this information monthly to the competent authorities from 1 October 2021 for ammonium nitrate; and from 1 February 2022 for hydrofluoric acid.

Finally, additional requirements are required for hydrofluoric acid concentrations greater than 10% w / w and for ammonium nitrate greater than 80% w / w.

EUROPEAN COMMISSION: LIMITED PFCAs STARTING FEBRUARY 2023

The European Commission has published a regulation that restricts certain perfluorocarboxylic acids (C9-C14 PFCA), a subgroup of per- and polyfluoroalkyl substances (PFAS). PFCAs cannot therefore be placed on the market or used in most applications from 23 February 2023, while some uses have been granted longer transition periods.

The restriction is in line with EU aspirations to phase out all non-essential uses of PFAS and will reduce or prevent exposure of people and the environment to PFCAs, as well as avoiding the replacement of PFOA, which has been globally banned since July 2020.

KKDIK (TURKISH REACH): LATE PREREGISTRATION ACCEPTED BY TURKISH AUTHORITY ONLY EARLY 2021

ACT NOW IF YOU LOST THE LAST DEADLINE

In 2017, Turkey published and consolidated the text of the KKDIK regulation regarding chemicals that can be placed on local national market. The scheme adopted follows the European REACH regulation in many prescriptions, so much so that it is often referred to as Turkey-REACH.

One of the significant differences is that there is only one registration deadline for all tonnage bands, set for 31/12/2023.

At this stage, the possibility is open to pre-register by 31/12/2020 but the Turkish government seems to accept late preregistration until 31.12.2023.

Moreover, in the last quarter of 2021 The MoEU will add a sub-tool into the KKS in order to generate Chemical Safety Report.

As for REACH EU, applicants must be Turkish legal entities. Non-Turkish companies that want to keep the market will have to appoint a local OR (only Representative). RNI srl can offer this service.

SEA UPDATES:

The SEA CLP like Regulation has been updated, adding 110 new substances to the Harmonized List of classification and labeling "and new hazard classifications. Furthermore, only polymers must be notified and not their ingredients.
