

## **SARSCoV2 - Supply and Demand, Source Epidemic Prevention Supplies Globally and Technical Disinfection product assistance.**

The novel coronavirus epidemic (COVID-19), which started late December in Wuhan City and the has resulted in global supply chain disruption, leading to shortages of many supplies, especially essential medical devices and personal protective equipment.

There is still something we can do to support each other and fight against the virus.

Now RNI is pleased to announce the organization emergency team is totally ready to support our historical expertise on the Disinfection product usage, authorization procedure and markets information, which aims to be an information bridge for global suppliers and buyers of epidemic prevention products.

Our service focus is aimed at companies that purchase prevention supplies of the epidemic or sell protective devices such as PPE, masks, protective suits, disinfectants for skin and surfaces etc.

RNI offers regulatory support to new Manufacturers of Sanitizing Cosmetics, Medical Devices, PPE, PT1 skin disinfectants and PT2 surfaces disinfectants. We may support all those who intend to produce and/or sell these devices/products on Italian market and in EU/CH/GB markets, according to the new COVID19 rules.

RNI also offers regulatory support to new Importers of Sanitizing Cosmetics in the EU, Medical devices, PPE, PT1 skin disinfectants and PT2 surfaces disinfectants. We may support all those who intend to import these devices/products from outside the EU in compliance with the new rules in force for COVID19 emergency.

### **HOW IT WORKS**

This services allows both buyers and suppliers to match their mutual commercial interest helping effectively match supply and demand on the Unional market the also providing EU certification for your products.
